

Statistical Comparison of Resolution Rates

(a) Each Arm vs. Baseline

(b) Pairwise Comparisons

Omnibus test across all five arms (Friedman, within-failure permutation): $p = 0.006$. (a) Mean per-failure difference with 95% bootstrap CI over 21 failures; exact Wilcoxon signed-rank p .

(b) Exact Wilcoxon signed-rank on per-failure rates; cells show Holm-adjusted p over 10 comparisons, raw p in parentheses.
